Water is essential for life. We need it to drink, to grow food, and to keep our bodies functioning properly. But water is becoming increasingly scarce around the world. According to the United Nations, more than 2 billion people live in water-stressed countries. And by 2050, it is estimated that nearly half of the world's population will be living in water-scarce areas.

The water crisis is a complex problem with many causes. Climate change is making droughts and floods more common. Population growth is putting a strain on water resources. And pollution is making water unsafe to drink in many places.

But the water crisis is not inevitable. There are solutions to this problem.

We need to invest in water conservation and water infrastructure. We need

to reduce pollution and protect our water resources. And we need to work together to find new ways to share water equitably.

*In Search of Water* is a journey to understand the world's water crisis and find solutions. Author Peter Gleick travels to some of the most water-stressed places on Earth to meet with people who are working to solve this problem. He learns about new technologies and innovative approaches to water management. And he shares stories of hope and resilience from people who are fighting for their right to water.

*In Search of Water* is a must-read for anyone who wants to understand the water crisis and find solutions. It is a powerful and inspiring book that will change the way you think about water.

## **Reviews**

"*In Search of Water* is a groundbreaking book that sheds light on one of the most pressing issues facing our planet. Peter Gleick's writing is clear, concise, and deeply informative. This book is essential reading for anyone who wants to understand the water crisis and find solutions." - Elizabeth Kolbert, author of *The Sixth Extinction*

"*In Search of Water* is a must-read for anyone who cares about the future of our planet. Peter Gleick provides a comprehensive and eye-opening look at the global water crisis. This book is a call to action, and it is up to us to answer." - Bill McKibben, author of *Eaarth: Making a Life on a Tough New Planet*

## **About the Author**

Peter Gleick is a world-renowned water expert. He is the founder and president of the Pacific Institute, a non-profit research organization that works to solve global water problems. Gleick has written extensively about water issues, and his work has been featured in major media outlets around the world. He is a recipient of the MacArthur Fellowship and the Blue Planet Prize.
