In a world where women are often expected to be submissive, the concept of submissive speech can be a controversial one. But what does it really mean to be submissive in speech, and how can it be used to empower women?

Submissive speech is not about giving up your voice or your power. It's about using your voice in a way that is respectful and empowering to yourself and others. It's about communicating your needs and desires in a way that is clear and direct, without being aggressive or demanding.

There are many benefits to using submissive speech. It can help you to build stronger relationships, resolve conflict more effectively, and achieve your goals more easily. When you speak in a submissive way, you are

more likely to be listened to and respected. You are also more likely to be seen as a leader and a role model.
