

# Parkinson's Disease: An Issue of Clinics in Geriatric Medicine - The Clinics

A Comprehensive Guide for Clinicians and Researchers

Parkinson's Disease (PD) is a complex and progressive neurodegenerative disorder that affects millions of people worldwide. It is primarily

characterized by motor symptoms such as tremors, rigidity, and bradykinesia, but it can also lead to a range of non-motor symptoms, including cognitive impairment, depression, and sleep disturbances.

As the population ages, the prevalence of PD is expected to increase significantly. This has created a pressing need for clinicians and researchers to gain a deeper understanding of this debilitating condition in Free Download to develop more effective diagnostic and therapeutic approaches.

This comprehensive guide, "Parkinson's Disease: An Issue of Clinics in Geriatric Medicine - The Clinics," provides a state-of-the-art overview of the latest research and clinical practices in PD. Written by a team of leading experts in the field, this book covers a wide range of topics, including:

- The epidemiology, etiology, and pathogenesis of PD
- The clinical presentation, diagnosis, and differential diagnosis of PD

- The latest advances in pharmacological and non-pharmacological treatments for PD
- The management of non-motor symptoms in PD
- The role of rehabilitation and palliative care in PD
- The ethical and legal considerations in the care of PD patients

This book is an essential resource for clinicians and researchers who are involved in the care of PD patients. It provides a comprehensive overview of the latest research and clinical practices, and it offers practical guidance on how to effectively diagnose, treat, and manage this challenging condition.

### **Key Features**

- In-depth coverage of all aspects of PD, from epidemiology to management
- Written by a team of leading experts in the field
- Up-to-date information on the latest research and clinical practices
- Practical guidance on how to effectively diagnose, treat, and manage PD
- An essential resource for clinicians and researchers involved in the care of PD patients

### **Table of Contents**

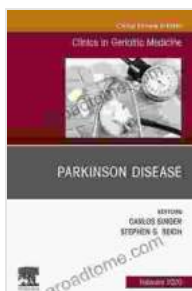

1. Epidemiology, Etiology, and Pathogenesis of Parkinson's Disease

2. Clinical Presentation, Diagnosis, and Differential Diagnosis of Parkinson's Disease
3. Pharmacological Treatment of Parkinson's Disease
4. Non-Pharmacological Treatment of Parkinson's Disease
5. Management of Non-Motor Symptoms in Parkinson's Disease
6. Rehabilitation and Palliative Care in Parkinson's Disease
7. Ethical and Legal Considerations in the Care of Parkinson's Disease Patients
