A Canvas of Time: The Eocene Epoch

Cast your mind back to the Eocene epoch, approximately 50 million years ago. The earth was a vastly different place, with lush forests blanketing the globe and a vibrant array of animals roaming the land. Fossil Butte and Fossil Basin, once part of a vast inland seaway, were teeming with aquatic life.

A Legacy of Life: Fossilized Treasures

As the seaway gradually receded, it left behind a rich tapestry of fossilized remains. The sedimentary rocks of Fossil Butte and Fossil Basin have preserved an astonishing diversity of organisms, from tiny fish to massive mammals.

The monument's namesake, Fossil Butte, stands as a testament to the region's ancient inhabitants. Its iconic butte reveals countless layers of fossilized algae, insects, fish, reptiles, and birds, providing a captivating glimpse into the Eocene ecosystem.

Beneath the Surface: Fossil Basin

Extending beyond the monument's boundaries, Fossil Basin offers an even more vast and varied fossil record. From the Green River Formation to the Bridger Formation, these strata hold an extraordinary assemblage of fossils, including:

- **Fish:** Hundreds of species, including the iconic *Knightia* with its distinctive butterfly-shaped scales.

- **Reptiles:** Giant crocodiles, turtles, and lizards, such as the fearsome Champsosaurus.
- **Birds:** An incredible diversity of prehistoric birds, including the massive Diatryma, standing over 6 feet tall.
- **Mammals:** Early primates, giant ground sloths, and the saber-toothed cat Dinictis.

A Journey Through Time

Today, Fossil Butte National Monument and Fossil Basin invite visitors to embark on a journey through time. Guided tours, self-guided trails, and museum exhibits provide an immersive experience, revealing the intricate tapestry of Earth's past.

As you wander among the fossil-rich buttes and dig for your own treasures in the scientific exploration area, you'll feel a profound connection to the ancient world. Each fossil tells a story, providing clues to the creatures that once inhabited this remarkable landscape.
